b. Security Shelving P&SCB has an unfunded requirement for both power shelving and self propelled shelving to accommodate the moves of Security Records Division files and Polygraph files to Building. Current plans would require these files to be in place 1 September 1983. There are several problems that must be surmounted: 1) need to know if a sprinkler system will be required, 2) need to know when the area will be available for a contractor to start installation, and 3) need an adequately defined specification for what is desired. Once these are determined, P&SCB will compete for shelving and installation under the mandatory Federal Supply Schedule rather than accept the sole source request made by the Director of Security.
